

## Product Description

Why was I born?

As far as you known, the traditional spot light is indispensable for interior decoration, and it is also the largest part of indoor lighting, big demand in the market include the importer and end-user. RUNWIN has been studying how to find a way in the competitive spot light market for a long time. The traditional spot lights are mostly made of metal. when metal price kept rising in the past years, it caused no space for price reduction any more. After a lot of marketing work, we found the plastic with anti-fire material could be a good solution.

In 2017, RUNWIN **GU10 Spot Light PC Frame** was successfully launched into the market after continuous testing. Many clients was very satisfied with them and placed trial orders at once to test the feedback from their market. The truth is this new product become hot selling immediately in the market. It is very acceptable by the end-user.

## Hot Selling Points

- ✓ Stable Quality  
we adopt the new material of plastic and mix with anti-fire and anti-yellow material to ensure the fireproof and guarantee 10 years non-yellowish.
