

120°
Sensor Angle

Andromeda

Beautiful shape! Save resources while illuminating you!

- The optical lens is adopted, which has strong light-gathering ability, and the light range is bright and clear.
- With light on the back, unique halo on the wall.
- Foldable design. Portable and easy to store, 20% savings in shipping volume to reduce transportation costs.
- PIR motion sensor, the upgraded motion sensor is more sensitive, with 120° sensor angle and 3-6m sensing distance.
- One-piece design, easy installation.
- High efficiency solar panel, which is guaranteed fast charging.
- Large capacity—18650 lithium battery:1500mAh, 1800mAh and 3000mAh for option.
- Wide application: courtyard, garden, outdoor wall, garage, deck and other outdoor places.

LED Highlight Beads—High brightness
Optical Lens—Brighter and clearer light range
